SUMMARY

React Front End Engineer who is proficient with React.js. my primary focus will be on developing user interface components and implementing them following well-known React.js workflows (NextJS and Redux). I will ensure that these components and the overall application are robust and easy to maintain. I will coordinate with the rest of the team working on different layers of the infrastructure. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality product is important.

TECHNICAL QUALIFICATIONS

Good knowledge in JavaScript, including DOM manipulation and the JavaScript object model
Thorough understanding of React.js and its core principles
Experience with popular React.js workflows (such as Redux for state management) and the NextJS Framework.
Familiarity with newer specifications of EcmaScript.
Familiarity with GraphQL and fetching data efficiently from multiple sources.
Knowledge of modern authorization mechanisms, such as JSON Web Token.
Familiarity with modern front-end build pipelines and tools.
Experience with common front-end development tools such as Babel, Webpack, NPM, etc.
Ability to understand business requirements and translate them into technical.
Familiarity with code versioning tools such as Git.
